Nautical Chart SonarChart™ Community Edits

¹ Navionics+ is also available in Small sizes at a lower price and can be upgraded to a regular Navionics+ region online.
² SonarChart™ Live is the most efficient way to enhance SonarChart™ because sonar logs are automatically sent to Navionics, and you can monitor the improvements while navigating. The feature is available with any version of our Boating app and on select chartplotters. Learn more at navionics.com/en/sonarchart-live.
³ Latest firmware release is required to run memory cards over 2 GB.
⁴ Cannot record sonar logs on the unit. We recommend using SonarChart™ Live.

Starting from 2013, our products are provided on 2 GB or larger memory cards. Always make sure your GPS chartplotter is compatible. Some GPS chartplotters may be compatible with 2 GB memory cards but may still have difficulty with large file sizes.

SONARCHART™ LIVE

Displays on MFD SonarChart™ Live displays directly on the screen of Raymarine MFD models updated with Lighthouse II v17 or newer software. Also requires a Navionics+, Navionics Updates or Platinum+ card that has an active chart updates subscription and has been updated after April 2016 at navionics.com or by a dealer. Silver and Gold can take advantage of this set of features by upgrading with Navionics Updates.

Built-in Wi-Fi This plotter can connect wirelessly, with no need of external Wi-Fi routers, and easily enable SonarChart™ Live.

EXTERNAL WI-FI ROUTERS

- A GoFree WIFI-1 Module** by Navico 
- B Sonar Server** by Digital Yacht - connect it to your plotter or to your sounder 

STAND ALONE WI-FI SOUNDERS

- Wi-Fish** by Raymarine 
- SonarPhone T-BOX** by Vexilar - SP200 and SP300
