

Front-end Web Developer

Navionics is looking for a talented Front-end Web Developer that will be in charge of developing new features for our responsive websites using JavaScript, HTML and CSS.

What you'll do:

- Implement front-end changes and develop new functionalities
- Work with our engineering team to design and deliver new features for our web applications storefront
- Build world-class consumer web applications, with a focus on front-end
- Collaborate with team members to create effective technical solutions
- Practice test-driven development, unit testing, integration testing

What you'll need:

- Expertise in relevant coding languages (JavaScript, jQuery, HTML5, CSS3, AJAX, JSON, XML and PHP)
- Comfort working with various JavaScript libraries (Angular, React)
- Deep understanding of front-end development concepts (client-side versus server-side, responsive web design, cross-browser compatibility)
- Experience building custom interface components and clean, portable code
- Ability to understand requirements from product owners and work with teams to ensure timely delivery
- Strong communication, presentation and documentation skills
- Solid understanding of software engineering best practices (code reviews, source control, build processes, testing)
- Experience working with JavaScript and Node.js projects
- Ongoing curiosity for new technologies, approaches, and solutions

Bonus points if you have:

- Familiarity with Agile methodologies
- Experience in customizing Magento's front-end components using layout XML, blocks, and templates
- Experience in developing Ruby on Rails applications

Our home: you can find us in via Fondacci 269 in Massarosa (LU), Italy

Company:

Navionics, a Garmin® Ltd. company, develops and manufactures electronic navigation charts of marine areas, lakes and rivers around the world for use in GPS chartplotters and mobile devices. You can find us in the App Stores or at www.navionics.com
