

## **Scrum Software Tester**

This is not a test. Navionics is seeking for Software Testers who will be part of software development teams where the Scrum methodology is applied.

You will be a key contributor to the team test strategy. Based on the functional descriptions, you will define test specifications, scripts and make estimations about efforts. You will perform tests on Scrum items, both manually and by automation, and you will continuously optimize and extend the test environment. Your main task will be verifying the user stories by means of accurate software testing methods and methodologies.

Do you have an international mindset and experience? Do you speak English? Are you willing to have fun sailing, cruising and motorboating and travel the world? If the answer is yes, come and work with us!

If you are up to the test, send us your resume.

### **What you'll do:**

- Develop and implement efficient and effective testing strategies, test conditions and test scripts for projects in an Agile Scrum environment
- Provide appropriate testing coverage and requirements traceability through the creation, implementation and enhancement of comprehensive test plans, test cases/user stories, test steps and test automation
- Define clear expectations for all testing tasks, including inputs and outputs
- Identify gaps and deficiencies in business requirements, technical specifications, designs and testing documentation for completeness and testability

### **What you'll need:**

- Bachelor's degree in technical discipline or equivalent professional experience and a minimum of 3 years relevant experience or equivalent combination of education and relevant experience
- Must possess experience and/or training in high level computer languages such as C/C++/Java and scripting languages relevant to Navionics' business needs
- Demonstrates mastery of relevant software testing tools and methodologies (e.g. configuration management systems, debuggers, simulators, testing tools)
- Must demonstrate proficient ability to capture and document refinements to testing requirements
- Demonstrated strong and effective verbal, written, and interpersonal communication skills
- Must be team-oriented, possess a positive attitude and work well with others
- Understanding of programming for the web and basic web security

### **Bonus points if you have:**

- Basic knowledge on cartography and GIS tools
- Familiarity with Content Management Systems

**Our home:** you can find us in via Fondacci 269 in Massarosa (LU), Italy

**Company:**

Navionics, a Garmin® Ltd. company, develops and manufactures electronic navigation charts of marine areas, lakes and rivers around the world for use in GPS chartplotters and mobile devices. You can find us in the App Stores or at [www.navionics.com](http://www.navionics.com)
